

HONEY Acoustic Wall Tiles

HONEY is hexagonal shaped acoustic wall tile. It is a sound absorbing solution for Educational and Creative spaces, where noise levels can be distracting. These panels are perfect to use on outer walls of an open-plan space.

The panels have sound absorbing properties that help to dampen a portion of the sound that travels horizontally. As a result they offer both a functional and an attractive element to any space.

The Hexagonal shapes can be used in a variety of configurations and fun colours to achieve an eye catching design.

The Panels can easily be installed in existing spaces (retrofit applications) or part of a new fit out/design.

Sounds like a solution

CATEGORY:

Acoustic Wall Tiles

PACKAGING:

Carton - 6 tiles per box

COMPOSITION:

Mumble® Acoustic Panel is 100% compressed polyester fibre (60% recycled) and is fully recyclable
